

Laravel Artisan Command Cheat Sheet

Step-by-Step: Creating Tables in Laravel

1. Create Model with Migration:

```
php artisan make:model Task -m
```

2. Edit the generated migration file in database/migrations/ to define your table fields.

3. (Optional) Create a Session Table Migration:

```
php artisan session:table
```

4. Run All Migrations:

```
php artisan migrate
```

5. (Optional) Create a Controller:

```
php artisan make:controller TaskController
```
